Background Study

Online book shop is a online platform which sell and buy the all books and consumer too buy and sell it. This application very helpful for busy man. There are a lot of people who are outside of the town, they can not come in town for their busy time or traveling pain, this application very help them. The teenager are more interest to shopping through the online, because they have more time sit in front of their computers and surfing internet. They purchases in order to needs the books in this platform. It enables you to shop while you are at home, in the office or on the go and get books and delivered as fast as possible in our busy world. In a nutshell, this is very good and beneficial for all people who purchase books online.

In Market there exists similar products:

There are already some popular platform. These are:

- Rokomari.com
- boibazar.com
- Boighor.com
- BookShopBD.com
- Studyhousebd.com

Why choose the online book shop?

-When you shop online, you save a lot of time which you would have wasted wandering from one store to another if you were to shop at the conventional bookstore. Beside from that, there is no fixed time for online shopping. You can shop anytime. This is a huge plus to the homebound people or in a situation where the weather is hostile outside.

- When you shop online, you have the chance of accessing and going through customers who have shopped at that store and review about the book you intend to buy.

- Ordinary stores have limited space to display books, but online store has huge databases, and can hardly miss finding the book are looking for don't find the book are looking for.

Abstract:

Online Book shop means visiting a website that holds a wide variety of books underspecific categories. This brings us the comfort to sit at any place and purchase any book that weintend to read.This also saves our valuable time and gives us a wide options to choose from at one stop.This also gives an option to customers to shop from anywhere by giving them aglimpse of few pages in the book to make it easy for customer to decide whether to go for thebook or not. Customers can also request return of the book, if they don't like it after receiving.

Features:

The system has two major actors and each actor has its features to carry out as follows:

Admin

Admin is the person who controls, monitors and keeps the whole records of Books. The main functions of the Admin are:

- Add/update/Delete Categories

- Add/update/Delete Sub Categories

- Add/update/Delete Books Records

- Check the existing users

- Check the Book orders from different users

User

User is the person who want to Purchase any Books. The main functions of the users are:

- User Registration

- User Login

-Check the details about us

-Contact to Admin

-Search Book

-Add to Cart book

-Payment at delivery.

-Rating of books.

-Review books.

Advantage online book shop:

-Saves time and efforts.

-Convenience of book Shopping at home.

- Wide variety / range of books are available.
- Get detailed information of the books.
- No pressure shopping for books.

Stakeholder's Feedback:

Super Admin's Feedback:

It will help people order their favorite dishes online given that from a huge menu and with payment options such as pay on delivery and order cancelation and guaranteeing in time delivery.

.....

Restaurant owner

Admin(01) Feedback:

Admin must have the access to verify user identity and ensure that there will be no scams in future.

.....

Nirjona Akter

Manager, Local book shop

Admin(02) Feedback:

Admin has to be responsible for his/her deeds. Also has to be user friendly. He has to carry his locality on his back and must inform if any changes in menu are required.

.....

Ziaul Haque

Local book seller

Admin(03) Feedback:

Users must have their name,mail,phone number for their registration and must have valid Gmail Account. So that admin can reject fake orders.

.....

Kanij Fatema

Book Shop manager

Admin(04) Feedback:

User data and book description should be preserved in two different database for our convinient of work. The ranked system must have access of admin. Admin must update book types and price on the website.We can have monthly meeting among the admins for the betterment of our future plans.
